

BREEZELESS+ ROUNDFLOW CASSETTE

Midea Breezeless+ Roundflow cassettes have a super slim design with low heights starting from just 205mm.

The range features 360° airflow, which is softened into thousands of tiny particles of cool air by 10,800 hourglass-shaped micro holes to eliminate the feeling of cold draughts. Optimum comfort can be achieved, tailored to each unique user's preference via various modes; Air Blast, Gentle Flow and Power Breezeless.

BREEZELESS+ EFFECT

10,800 hourglass-shaped micro holes turn the airflow into thousands of tiny particles of cool air, softening the airflow to eliminate the feeling of cold draughts.

360° AIRFLOW OUTLET

360° air outlet provides even airflow circulation to cool or heat every corner of a room and keep a constant temperature.

'FOLLOW ME' SENSITIVE COOLING

Keep the remote close to you and it will measure the temperature around you and adjust comfort levels accordingly.

FRESH AIR INLET & DRAIN PUMP

Built-in fresh air inlet creates a more comfortable environment. Optional motor available to increase the "fresh air effect". The built-in drain pump is mounted externally for easy maintenance, it is vertically exhausted and pumps up to 1000mm.

LED FASCIA DISPLAY

Built-in display for easy trouble shooting and system information.

INDEPENDENT VANE CONTROL

The direction of each vane can be set independently via the wired controller.

SUPER SLIM DESIGN

The height of the units starts from just 205mm.

TWIN COMBINATIONS

Outdoor unit sizes 36,42,48 & 55 can be installed with two indoor units for increased flexibility.

REMOTE SIGNAL

Built-in ports for on/off control and fault indication.

Anti-cold Air Function

Low Ambient Cooling

Emergency Use Function

Built-in Drain Pump

Wired Control

Central Control Management

Please note:

- For full Breezeless+ function set dip switch SW2-No.2 to on. Once active it can be enabled via (optional) infra-red controller.
- If humidity levels in a room rise above standard conditions the system will automatically switch to normal operation. This is to deal with the load before reverting back to Breezeless mode.
